**Ethical Issues in the Communication Process** - J. Vernon Jensen 2013-11-05. A rapid and widespread growth of interest in applied ethics is occurring today not only in the United States, but around the world as well. Academia both reflects this and is a leader in the movement. The field of speech communication shares in this increased sensitivity to ethical concerns. Students and the general public are looking for thoughtful analyses and guidance in all areas of communication. Ethical concerns relative to mass communication have been the subject of a number of books, but only a very few cover the entire scope of communication to include interpersonal, intercultural, organizational, small groups, and public speaking. This book tries to fill that need by discussing ethical concerns as they emerge in the areas of the communication process -- the communicator, the message, the media, the audience, and the situation. The speech communication field now has a need to digest and synthesize the existing research findings and the general literature in the field and in related humanities and social science works into a coherent and nontechnical discussion. This volume explores the most up-to-date materials to provide just such a synthesis. An extensive bibliography at the end of the book gives readers the sources on which the book is based, and offers ample avenues for further personal exploration. The book should provide meaningful food for thought as readers grapple conscientiously with the many everyday decisions made in communication transactions, and in evaluating the communication of others.

The Ethics of Interpersonal Relationships—Joyce Catlett 2018-03-28 Writing this book springs from a deep feeling for people and a grave concern that without a proper understanding of the reasons for their inhumanity in relation to one another and the development of a compassionate world view, it is likely that human beings may eventually destroy themselves and life on the planet. This work is an attempt to explain the source of destructive behaviour and how it manifests itself in personal relationships between men, women, couples, and families, and in the social arena. The author presents a position that
offers a hope of altering the destiny of humankind’s unethical behavior through better psychological understanding and education. Understanding the source of a person’s aggressiveness in defending the fantasy bond and learning to cope with the voice process have strong implications for child-rearing and better mental health practices.

Lady Friends-Karen L. Ito 2018-08-06 Many indigenous Hawaiians who have moved to the islands' cities languish at the bottom of the socioeconomic scale and are thought to have lost their cultural roots. Initially apolitical urban Hawaiians were often skeptical of activists who sought to revitalize traditional ways; yet, as Karen L. Ito shows, Hawaiian women in particular continue to maintain and express crucial aspects of their cultural heritage in their lifestyle and interactions with others. Ito conducted intensive fieldwork with six Honolulu families, all of which shared the distinguishing characteristics of Hawaii's matrifocal society. In her close examination of the friendships and family relations among the women in these households, she focuses on the significance of a traditional manner of speech known as "talk story" which they use when conversing together. She describes how her subjects employ metaphorical language to address issues concerning responsibility, retribution, understandings of self and personhood, and methods for conflict resolution. For these "lady friends," Ito finds, the emotional quality and quantity of their social relationships help define personal identity while their common concepts of morality bind them together. By applying ethnopsychological strategies to the exploration of culture, Ito demonstrates cultural continuity at a level where most observers would not expect to find it. Lady Friends brings a new dimension to Hawaiian research.
